

In the Specification

On page 3, please replace the original ninth paragraph (original lines 21-23) with the following rewritten paragraph:

Next to the position of the elastic system 6, the platform 4 has parallel passages 10 through which the support is assembled in the guides 3, which can consist of bars of a cylindrical section or another section. Figures 1 and 2 show an embodiment in which the guides 3 are bars of a circular section, wherein the parallel passages of the support 4 in which the guides 3 are inserted are passages of the same cross section as the guides.
